ABOUT SMOVIN

Smovin is a fast growing start-up based in La Hulpe. Our mission is to transform the real estate management market through digitalisation. We are currently a team of 12 passionate people and we are looking to strengthen the dev team.

Our main application is a single-page app built with VueJS which is connected to a Ruby on Rails REST API. Our application also uses a few serverless microservices written in TypeScript. This mix of interesting technologies make working at Smovin exciting and allows us to have our dose of daily challenges.

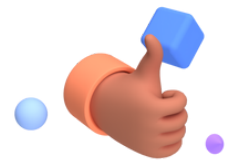

WHAT WE ARE LOOKING FOR

We are looking for a developer (NL/FR) who has experience in backend web development (1-3 years).

You would join the development team to design and develop new features, with the help of requirements and designs provided by the Product team, on the main application as well as the various services it connects to in order to ease up the daily job of real estate managers.

YOUR RESPONSIBILITIES

- Analyze problems and come up with sensible solutions
- Participate in designing the architecture of new features, define best coding practices and review commits of other developers of the team
- Help the support team whenever users have unexpected issues
- Maintain the code quality and the test suite we are proud of
- Explain how the app works in layman's terms to members of other teams and handle requests for data
- Share your knowledge and experience with other members of the team

WHAT'S GREAT ABOUT THIS JOB ?

- The freedom to design and give opinions on the features you will be working on
- The opportunity to propose and test new technologies through our "innovation" weeks that take place at the end of each development cycle
- A new position where you will be encouraged to contribute with your ideas
- Strategic position in the company with potential great personal development
- A learning experience where you will develop an expertise in the SaaS industry and the real estate domain
- A small but amazing team of 12 direct colleagues
- Horizontal organization which empowers you and value your opinion
- A partly remote job

REQUIREMENTS

- Be curious, have logical thinking and not be afraid to be confronted with new concepts
- Have experienced as a backend web developer (1-3 years)
- Have experience in working with Object Oriented programming languages
- Speak Dutch (and English) and/or French fluently

Proven past experience with our technology stack is a plus:

- Ruby and Rails
- PostgreSQL
- VueJS
- TypeScript
- Serverless services such as AWS Lambda, Google Cloud Functions, ...
- Side- or open-source projects related to web development

WHAT WE OFFER

- A full-time position with attractive package
- A partly remote job
- Several events : after works, barbecue, team building, etc
- A great team full of young dynamic people
- Fruit basket, coffee and ...

WHO WE ARE

We are a team of 11 colleagues passionate about the SaaS industry. Our offices are near Brussels in La Hulpe.

Over the years, we have developed a deep expertise in the SaaS industry and in the real estate sector.

Our values are at the heart of our work :

- **Make it simple (Simplicity)** : The world does not need more complexity. It is our goal to make it as simple as possible for ourselves and for our clients. Every time you need to choose, be it a new feature, a new design, or a new process, go for the simple one.
- **Act like an owner (Empowerment)** : Don't wait for others to tell you what to do. You are in charge of shaping your contribution to the company. Make decisions with Smovin's best interest in mind and learn in the process.
- **Be trustworthy (Integrity)** : By the standards of the rest of the world, we overtrust. We're okay with that. Make sure that your colleagues and clients can trust you all the time. Be transparent, be fair & be consistent.

Life at Smovin is great
